Positioning (vs MSCI World)

Market Outlook

MACROECONOMIC ENVIRONMENT

--

VALUATION

SENTIMENT

-

Signs of a change in the inflation scenario are accumulating: a tight labour market, inflation in services and declining global trade flows. Central banks are hardening their tone and tightening credit conditions. On average, an oil price spike implies an earnings recession 12 months later. We expect the combined effects of all these factors to depress corporate earnings in the coming quarters. Accordingly, we have revised our macroeconomic vector downward from single negative to double negative (- -).

Interest rates that stayed very low for a number of years pushed stock prices to extremely expensive levels. The rise in interest rates should have the opposite effect. The combination of rising interest rates and high prices has resulted in global equities that are at their least attractive level in more than a decade. We are maintaining a triple negative for the valuation vector (- - -).

Volatility is back, along with large differences across sector returns. Our sentiment index captured the rising uncertainty well, but the equity markets were very resilient despite the build-up of financial and geopolitical risks. Investor sentiment is no longer euphoric; instead, it is rather pessimistic and continues to deteriorate. As a result, we have revised the sentiment vector upward from double negative to single negative (-).

Our analysis of the three vectors has prompted us to maintain a defensive positioning. We are concerned about high equity valuations and high-risk investor positioning at a time of increasing economic uncertainty.

Global Equities

Summary

Benchmark	MSCI World (net)
Value added objective	2% (4-year rolling periods)
Active risk	3% to 5%
Number of holdings	275 to 350 (higher if exposure to EM)
Currency management	Active
Maximum cash exposure	10%

Investment Process

Sources: MSCI, DGAM, as of March 31, 2022

FOR CANADIAN INSTITUTIONAL INVESTOR USE ONLY

The performance shown is that of a composite of global equity mandates managed by Mr. Vital Proulx and his team at Natcan (1999 to 2004), Hexavest (from May 2004 to August 2021) and DGAM (since September 2021). Accounts in the composite may have investment guidelines that differ from those of the representative account. The inception date of the composite is January 1, 1999. Performance results are presented gross of management and custodial fees but net of all trading commissions. Returns for periods greater than 12 months are annualized. Past performance is not necessarily indicative of future performance.
