## RESPONSIBLE INVESTMENT

- Selection based on negative and positive filters developed by DGAM's ESG research team.
- Systematic exclusion of largest carbon emitters, fossil fuel emitters, coal extracting companies, and companies in the tobacco and armament industries.
- Qualified companies are industry-leaders according to several ESG criteria.

## PORTFOLIO CONSTRUCTION

- Systematic approach
- Multifactor model: varied sources of alpha that have performed well in the past and whose perspectives are rational
- Target beta of 1.0 to capture market return
- Systematic control of active risk
