Source of company ESG data: Refinitiv

Responsible investment

- Selection based on negative and positive filters developed by DGAM's ESG research team.
- Systematic exclusion of largest carbon emitters, fossil fuel producers, coal extracting companies, and companies in the tobacco and armament industries.
- Qualified companies are industry-leaders according to several ESG criteria.

Portfolio construction

- Systematic approach.
- Multifactor model: varied sources of alpha that have performed well in the past and whose perspectives are rational.
- Target beta of 1.0 to capture market return.
- Systematic control of active risk.

Style biais (vs MSCI World)
